## The Strength and Styling of Summer Fun Pools

### Summer Fun's Exclusive Support System Combines Great Looks and Real Strength

#### CHANNEL-LOK I BUTTRESS SYSTEM

The Channel-Lok I Compact-Buttress System requires fewer angled supports (buttresses), yet provides an uncompromising level of strength. With fewer supports, space and side accessibility to the pool is increased while installation time is reduced. This is the only oval system with matching vertical supports. Unlike traditional buttress systems, the Channel-Lok I side verticals match the end verticals for eye-pleasing appeal.

A vigorous backhoe test is performed prior to the launch of each new pool.

### All-Weather Protection for Years of Family Fun

The top and vertical rails on every Summer Fun pool undergo a state-of-the-art protective treatment process. In addition, the top rails and verticals are coated with Texture-Kote. This combination provides incredibly long-lasting, all-weather protection with added resistance against corrosion, scratching, and damaging UV rays. Summer Fun's unique quadra-fold system and bolting pattern provides maximum wall joint strength. Pool walls are corrugated for increased durability and resistance to ice and impact damage. Only Summer Fun pools feature the self-supporting stabilizer bar developed to simplify homeowner installation. This ease of assembly has made Summer Fun pools the number one choice of many professional installers.
